main tag:

main tag specifies the main content of a document

The content inside the <main> element should be unique to the document.
It should not contain any content that is repeated across documents such as sidebars, navigation links, copyright information, site logos, and search forms.

There must not be more than one <main> element in a document.
The <main> element must NOT be a descendant of an <article>, <aside>, <footer>, <header>, or <nav> element.

section tag

section tag when we be searching our website in search engine it will try to get text information from the selected area

details tag and summary tag

details tag contains additional details that user can open and close on demand
summary tag will be the first child to the details tag

header tag and nav tag and footer tag

The nav element represents a section of a page that links to other pages or to parts within the page: a section with navigation links.

article tag and address tag

The article tag represents a complete, or self-contained, composition in a document, page, application, or site and that is, in principle, independently distributable or reusable, e.g. in syndication. This could be a forum post, a magazine or newspaper article, a blog entry, a user-submitted comment, an interactive widget or gadget, or any other independent item of content. Each article should be identified, typically by including a heading (h1–h6 element) as a child of the article element.

The address tag represents the contact information for its nearest article

picture tag and cite tag

picture tag is used to display the image base on the device we are using

cite tag can be used for highlighting the title
Eg: Not a singer name, Song Name
Eg: Not a director name, Movie Name
Eg: Not a company name, Bike Name

Diff bw img tag, picture tag, figure tag

img tag is used to add a single inner image as part of specific content

picture tag is used for responsiveness

figure tag advantage is we can declare the title using fig caption tag seo can find the title easily
fig caption tag can be used to give extra information like who is the photographer of those images, were the images taken
