08 List Tags

List Tags
======
😃lists are used to specify list of information
😃all of this lists may contain one or more list elements

We are having three types of list elements
1.Ordered List or Number List(ol)
2.UnOrdered List or BulletList (ul)
3.List Item (li)

🐹when we use ol tag we have list of numbers
🐣ol stands for ordered list
🦄ol tag can have number of li tags
🐾 when we use ol tag we have list of numbers

🐴ul stands unordered list
🐠li stands for list item
🦉Inside ul tag can have number of li tags

```
<ol>
<ol type="A">
<ol type="a">
<ol type="i">
<ol type="I">

<ul>
<ul type="circle">
<ul type="square">
<ul type="none">

<li value="101">HTML</li>

<ul type="none">
<li><img src="bullet.png" alt="bullet">HTML</li>
</ul>
```

1.definition list (dl)
2.definition title (dt)
3.detailed description/data definition (dd)

🍏 dl tag we pass some information for every definition list
🍎 dt tag can be used for the purpose of definition title
🍅 dd tag can be used for the purpose of detailed description/data definition

08 List Tags

1. List Tags ====== 😁lists are used to specify list of information 😁all of this lists may contain one or more list elements

1.1. We are having three types of list elements 1.Ordered List or Number List(ol) 2.UnOrdered List or BulletList (ul) 3.List Item (li)

1.1.1. when we use ol tag we have list of numbers ol stands for ordered list ol tag can have number of li tags when we use ol tag we have list of numbers ul stands unordered list li stands for list item Inside ul tag can have number of li tags

1.1.1.1. <ol type="A"> <ol type="a"> <ol type="i"> <ol type="I"> <ul type="circle"> <ul type="square"> <ul type="none"> <li value="101">HTML <ul type="none"> <img src="bullet.png" alt="bullet">HTML

1.2. 1.definition list (dl) 2.definition title (dt) 3.detailed description/data definition (dd)

1.2.1. dl tag we pass some information for every definition list dt tag can be used for the purpose of definition title dd tag can be used for the purpose of detailed description/data definition
